哥伦比亚北部沿海城市巴兰奎利亚,由于炎热来袭,小型分体式空调的销量大幅增长,根据当地经销商的统计,6月份的销量比5月份增长了30-40%。销量增长的原因主要是消费者对商用空调需求的增长,在一些电器商店里,空调系统的销量占95%。

根据门户网站DATAMYNE的统计,2011年1月-4月,哥伦比亚小型分体式空调的进口总量达46,397台套,中国是该产品的最大出口国,占到总量的90%,韩国和美国紧随其后,分别以6%和2%排名第二和第三位。

2010年,南美国家总的进口量为194712台套,中国是最大的出口商,占比为83%。

Air Conditioner Sales Increase in Colombia

Due to an incoming heat wave, mini split air conditioner sales in Barranquilla, a northern coastal city in Colombia, have increased significantly. According to local market data, sales in June have increased 30-40% over sales in May. This sales growth is mainly attributable to increasing demands for residential and commercial air conditioners. In some electronics stores, air conditioning systems account for 95% of sales volume.

According to statistics web portal DATAMYNE from January to April of 2011, Colombian imports for mini split air conditioners reached a total of 46,397 units. China is by far the largest exporter of these products, accounting for 90% of the total export volume. Korea and the United States trail behind in second and third position with only 2% and 6% respectively.

In 2010, South American countries imported a total of 194,712 units. China was the leading exporter, accounting for 83% of that volume.
