

# **The Year in Review:**

## **2009 Citrus Import/Export Report**

## ***About our Import/Export Report of the Citrus Industry:***

As the most innovative and advanced U.S. trade information provider to the international trade community, Zepol has created this report of the citrus industry for importers, suppliers, transportation companies, and other parties interested in the citrus industry for the United States market. The report provides a better understanding of where the U.S. citrus market has been in 2009 and where it is going in 2010 and the future.

We list information for all of the 10-digit HTS Codes (Harmonized Tariff System Codes) for all of the related products under HTS Code 0805. Each import and export code is examined to show the latest trends for these products and compared with the totals by value to the previous 12 months. For import HTS Codes, we provide key importers of the products to show a company level perspective.

All data was retrieved using Zepol's trade data tools, Trade**IQ**™ and Trade**View**™. These products are subscription services for the international trade arena. Subscribers have access to additional information for each product, port, and importer at both a transactional and aggregate level.

Data is reported as it has been released by government sources. In many cases, multiple sources will not show data that correlates. Most of these cases are accounted for because of how products arrive in the United States and the manner in which the U.S. government records shipment data.

Importer and supplier listings are sourced from U.S. Customs data from Zepol's Trade**IQ**™. These lists consist of information that estimates which importers and suppliers are actively importing products through U.S. Ports along with their associated volumes. This data is limited to containerized shipments, but may include some bulk cargoes. Some active consignees and shippers may not be listed; please see the "Report Note" on page 3 for more information.

The majority of the data contained in the profiles for each 10-digit HTS Code has been sourced from U.S. Census trade statistics from Zepol's Trade**View**™. All trends and information are presented as the U.S. Census Bureau has released the data to the public. Value represents general imports as assessed by U.S. Customs, or the price actually paid or payable, excluding U.S. import duties, freight, insurance, and other charges. Records show the number of times that the specified HTS Code has been listed on shipping documents.

Zepol hopes that the information in this report will be informative and help your organization plan for 2010 by fully understanding your market.

## ***Report Note:***

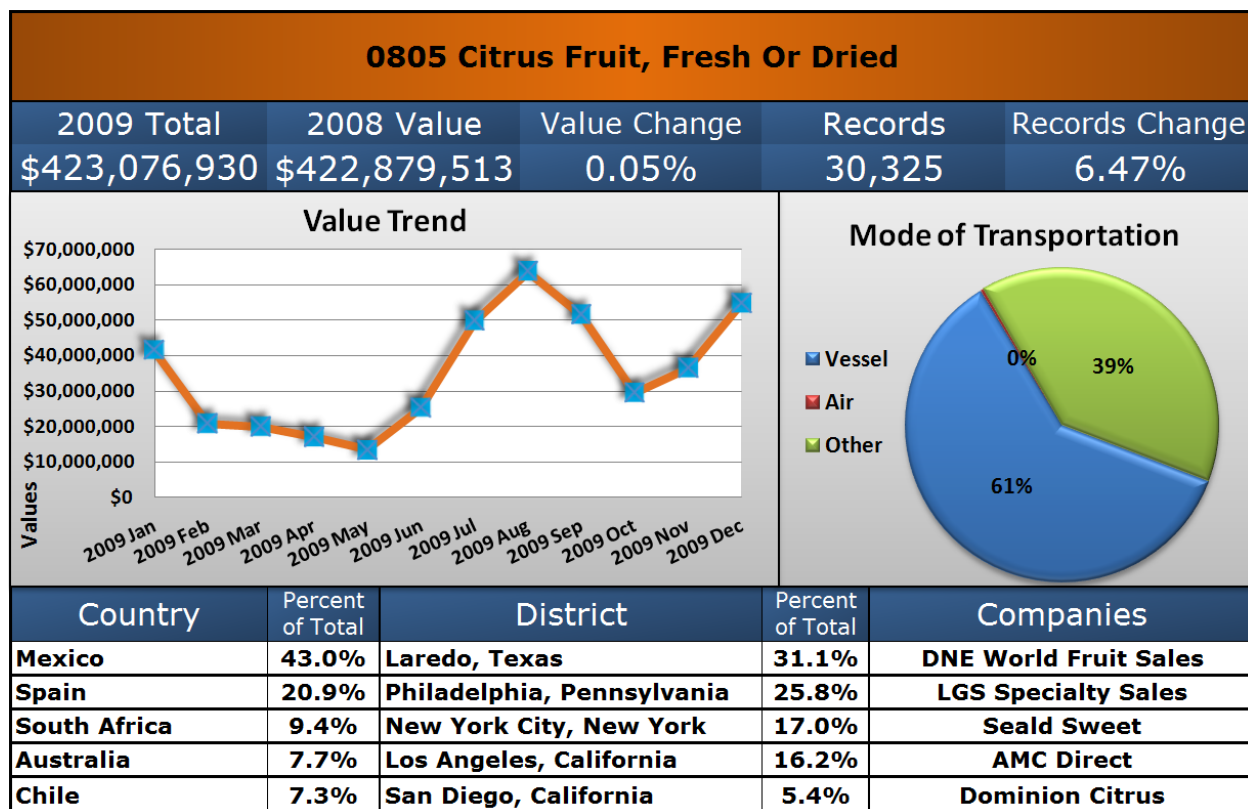

This report is based on data collected from the U.S. Census Bureau on a monthly-basis and it is subject to data anomalies present in the data set.

Because of this collection method, some data will show imports for consignees and shippers into the United States which were actually transshipments. For example, a Canadian company's imports to Canada could be reported as U.S. imports because of how U.S. Customs collects the data from shipping lines.

U.S. Customs allows importers to conceal the identity of their shipments. Thus, not all major importers and suppliers will be listed for specific HTS Codes and within the lists of consignees and shippers. This data represents the information as it is recorded by U.S. Customs. It may overstate totals from transshipments and may include other data anomalies.

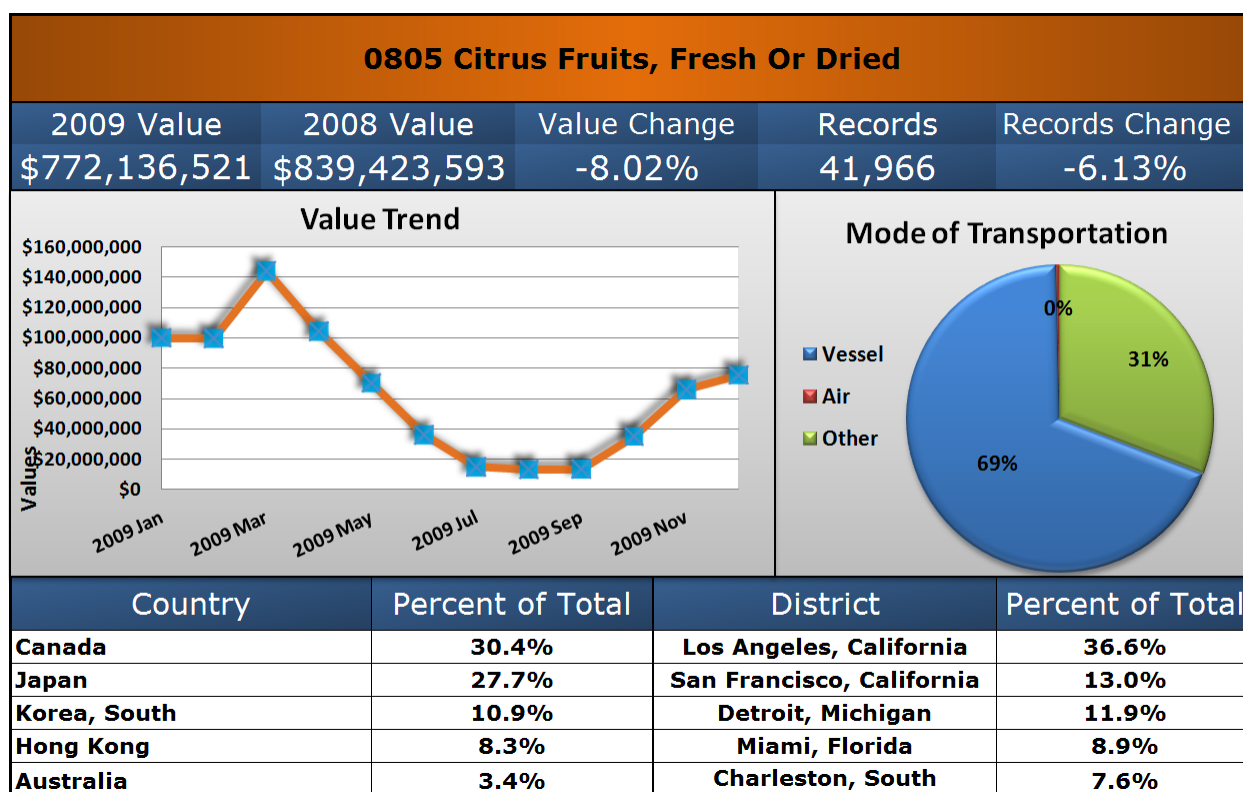

## 2009 Trade Activity HTS – 0805 Citrus Fruit, Fresh or Dried Import Product Categories

HTS Code	2009 Value	2008 Value	Change	Records	Records Change
<a href="#">0805.10.0040 Oranges, Fresh Or Dried, Neso</a>	\$92,901,151	\$71,231,284	30.42%	3,233	52.00%

## About Zepol

At Zepol, we provide innovative, online trade databases that generate real competitive advantages for businesses. With our products, Trade**IQ**™ and Trade**View**™, subscribers have access to vital trade data, developed entirely from U.S. government sources that offer insights into:

- [Competitive activity](#)
- [Potential sales leads](#)
- [Supplier sourcing](#)
- [Market trends and analysis](#)
- [Legal and brand protection](#)

Subscribers, in turn, use our databases to create smarter business strategies, new sales leads, and tactical market advantages.

[Trade\*\*IQ\*\*](#)™ - Subscribers can access millions of U.S. import shipments from over 200 countries, delivered via a user-friendly online database that makes finding the information you want easy. Analyze import shipments into the United States by searching Bill of Lading data and find the most up-to-date containerized shipment data easily.

[Trade\*\*View\*\*](#)™ - Using trade data released by the U.S. Census Bureau's Foreign Trade Division, subscribers use the most effective tool for analyzing U.S. imports and exports. Examine total imports and exports for products, ports, customs districts, and transportation types by U.S. dollar value, searching all trade activity.

Our company is a privately held corporation based in Minneapolis, Minnesota. Co-founders Paul Rasmussen and Jeff Wilson launched Zepol in 2002, using their extensive data warehousing, product development, and marketing backgrounds to bring a new solution to the international trade data industry.
