

Q3 2021 - Top NVOCCs Report

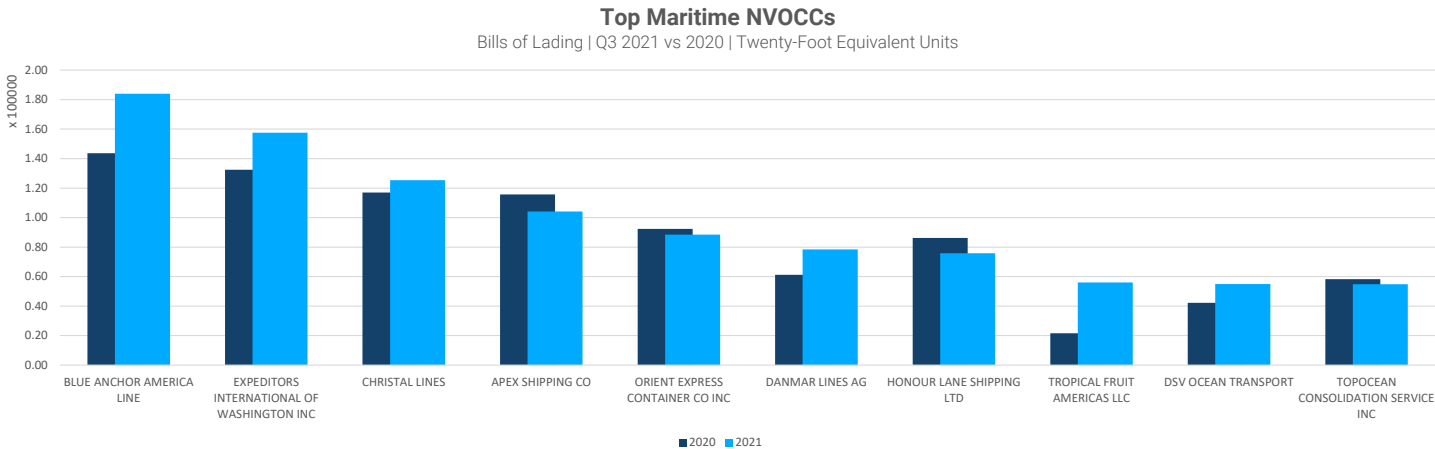

IMPORTS BY VOLUME

Overview & Digest

Through the third-quarter peak shipping season, major NVOCCs were experiencing a mix of results. While the top NVOCCs showed year-over-year increases in maritime volume, there were declines among the top ten. Much like carriers, this could indicate some consolidation among the top players during the Global Shipping Crisis, but this remains to be seen.

Overall, 2021 has been a historic year for the logistics and supply chain industry. Dominated by the Global Shipping Crisis and the lasting impact of the COVID-19 pandemic, U.S. imports have been impacted in a way unlike anything we’ve seen before. While maritime ports and carriers have been the focus of market observers, Non-Vessel Operating Common Carrier (NVOCCs) have experienced significant growth during the crisis.

Examining the entire year-to-date, every top maritime NVOCC is currently seeing double-digit percentile growth. This coincides with the growth seen by maritime carriers, providing a snapshot of the overall substantial increase in import volume to the United States so far in 2021.
